3rd Generation Automatic Vacuum Watch Waterproof Tester

Model: BJSSJ-03

PRODUCT OVERVIEW

Designed for professional watch servicing, the BIAOJIANG 3rd Generation Waterproof Tester provides accurate and reliable water-resistant testing using dry air pressure. It combines vacuum and positive-pressure testing, real-time curve analysis, custom programs, and one-touch automatic operation. Users can edit and save test programs for quick reuse. A printer is included for convenient test report printing.

PRODUCT HIGHLIGHTS

- **Vacuum & Positive-Pressure Testing**
  Evaluates watch case sealing under negative and positive pressure
- **Real-Time Measurement Curve**
  Visual analysis of watch case deformation during testing
- **One-Touch Automatic Testing**
  Run preset or customized test programs automatically
- **Thermal Printer Included**
  Convenient printing of test results
